

Corporate Fact Sheet

TeamF1, Inc. is a privately held corporation headquartered in Fremont, CA, with R&D labs in Hyderabad, India and local sales offices in various countries. TeamF1 has been providing solutions for enabling embedded innovations since November 1998 and currently employs more than 150 employees and sales representative around the world.

TeamF1 offers a complete security platform with well-integrated modular technologies tailored to the embedded OEM market, and designed to meet the stringent requirements of constrained embedded devices. These technologies are modular and can work stand-alone, or can be combined together, allowing key current requirements to be fulfilled and provide adequate head room for expanding the scope of their use in keeping with future end-customer requirements. TeamF1 products have been deployed in embedded systems by hundreds of OEM customers ranging from well-known Tier-1 customers to innovative start-up companies, and we have received high marks for our quality and support. TeamF1 offers professional services to complement our standard product offering such as customization for application-specific solutions and NRE services around the licensed software IP.

TeamF1's solutions provide networking and security for key infrastructure components of communication and industrial equipment, both wired and wireless. TeamF1 is proud to count among its customers not just networking and telecom companies but also a variety of other device OEMs in other fields that have used TeamF1 technologies for connecting securely to standards-based networks. This is a testament to how TeamF1's software is not just a leader in providing complete software for secure networking devices, but extends secure connectivity beyond the traditional data-communication market segments.

Some Well-Known Customers Using TeamF1's Solutions

- » Alcatel
- » ASTRI Hong Kong
- » Carrier Access
- » Edgewater
- » HP
- » L3 Communications
- » Motorola
- » Pirelli
- » Siemens
- » Tekelec
- » Wind River Systems
- » Zhone
- » Alcatel Shanghai Bell
- » Avaya
- » Cisco Systems
- » Evolium
- » Harris
- » McData
- » Newport Networks
- » Samsung
- » Sun Microsystems
- » Thomson
- » Yokogawa

Attesting to TeamF1's well-established credibility in the embedded space, most of the customers referenced above are multiple licensees and repeat customers - the result of TeamF1's focus on product quality and responsive support.

Besides Tier-1 OEMs, TeamF1 customers also include several start-up and mid-size technology companies who have successfully used TeamF1's solutions to reduce time to revenue.

TeamF1 also partners with leading technology vendors to provide the best-of-breed integrated hardware/software solutions. Partners working closely with TeamF1 include OS providers such as Green Hills Software, Lynuxworks, Monta Vista Software, Wind River Systems; leading processor SoC providers such as AppliedMicro, Broadcom, Cavium Networks, Marvell, Mindspeed, Netlogic Microsystems (including RMI, now a subsidiary of Netlogic); peripheral chip partners such as Atheros, Broadcom, Marvell, Metalink, Ralink; several ODMs and board design houses, and other third-party value-add software providers such as Continuous Computing and Visuality. TeamF1 is also a technology licensee and partner of Atheros Communications and a strategic Premier-Level technology partner of Wind River Systems.
